

# **Data Communication**

## **Network Topologies**

# 1-1 DATA COMMUNICATIONS

*The term **telecommunication** means communication at a distance. The word **data** refers to information presented in whatever form is agreed upon by the parties creating and using the data. **Data communications** are the exchange of data between two devices via some form of transmission medium such as a wire cable.*

## **Topics discussed in this section:**

- **Components of a data communications system**
- **Data Flow**

**Figure 1.1** *Components of a data communication system*

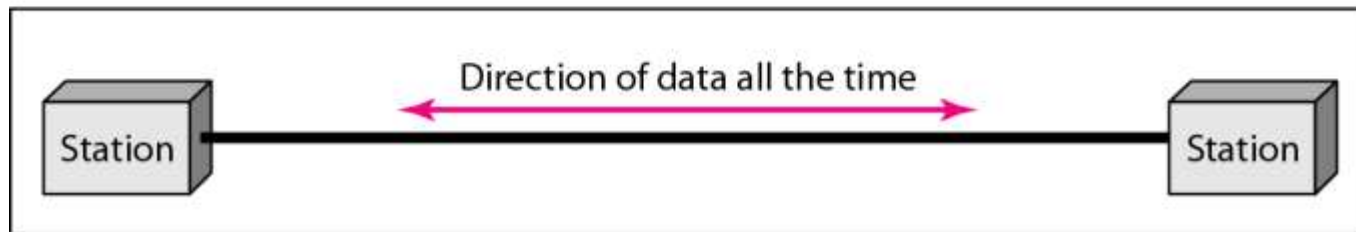

**Figure 1.2** *Data flow (simplex, half-duplex, and full-duplex)*

a. Simplex

b. Half-duplex

c. Full-duplex

# 1-2 NETWORKS

*A **network** is a set of devices (often referred to as **nodes**) connected by communication **links**. A node can be a computer, printer, or any other device capable of sending and/or receiving data generated by other nodes on the network. A link can be a cable, air, optical fiber, or any medium which can transport a signal carrying information.*

## *Topics discussed in this section:*

- Network Criteria
- Physical Structures
- Categories of Networks

---

# Network Criteria

---

- **Performance**

- **Depends on Network Elements**
- **Measured in terms of Delay and Throughput**

- **Reliability**

- **Failure rate of network components**
- **Measured in terms of availability/robustness**

- **Security**

- **Data protection against corruption/loss of data due to:**
  - **Errors**
  - **Malicious users**

---

# Physical Structures

---

- **Type of Connection**
  - **Point to Point - single transmitter and receiver**
  - **Multipoint - multiple recipients of single transmission**
- **Physical Topology**
  - **Connection of devices**
  - **Type of transmission - unicast, mulitcast, broadcast**

**Figure 1.3** *Types of connections: point-to-point and multipoint*

a. Point-to-point

b. Multipoint

---

**Figure 1.4** *Categories of topology*

---

---

**Figure 1.5** *A fully connected mesh topology (five devices)*

---

---

**Figure 1.6** *A star topology connecting four stations*

---

---

**Figure 1.7** *A bus topology connecting three stations*

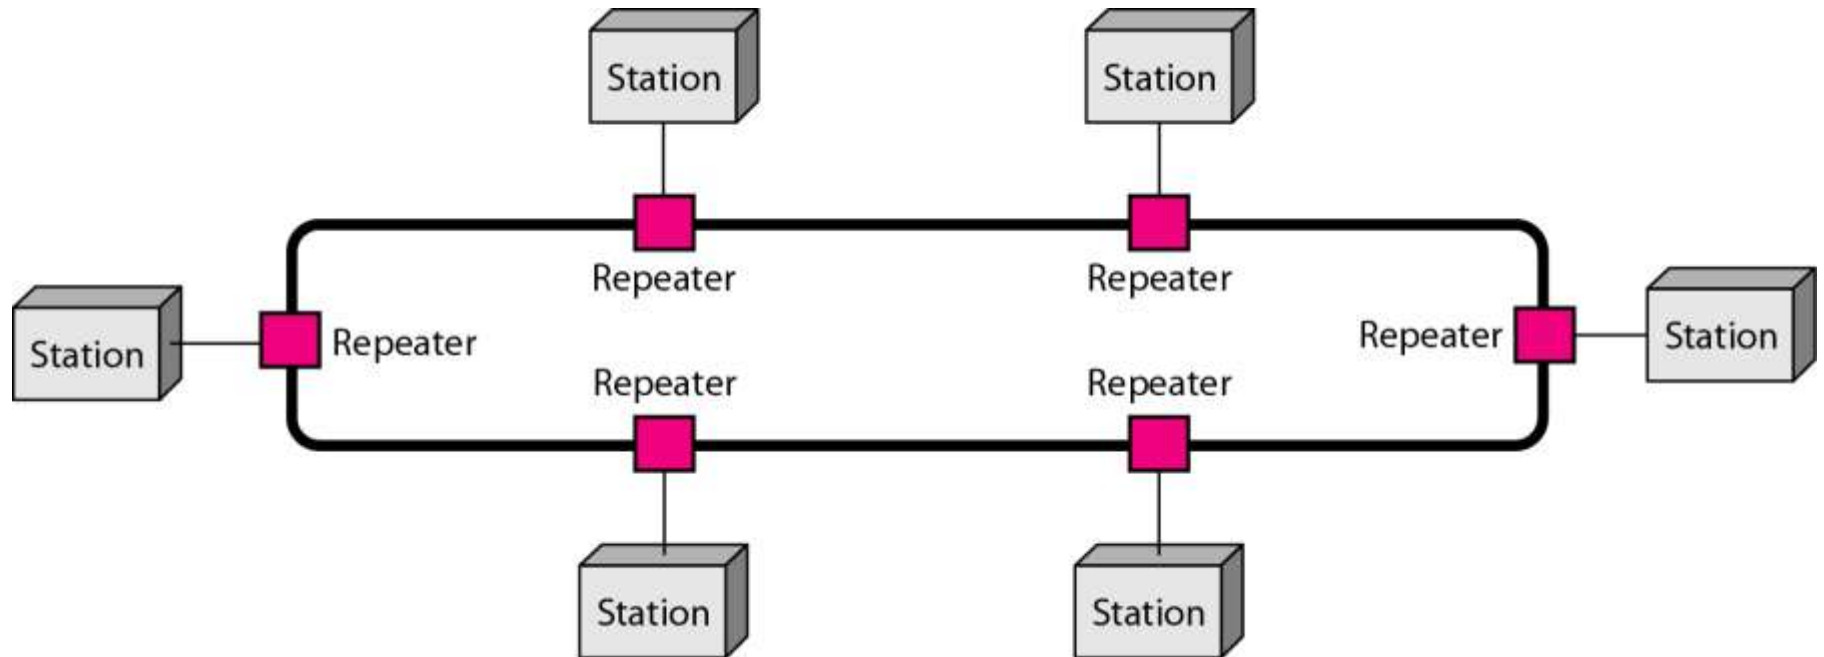

---

---

**Figure 1.8** *A ring topology connecting six stations*

---

**Figure 1.9** *A hybrid topology: a star backbone with three bus networks*

---

# Categories of Networks

---

- **Local Area Networks (LANs)**
  - Short distances
  - Designed to provide local interconnectivity
- **Wide Area Networks (WANs)**
  - Long distances
  - Provide connectivity over large areas
- **Metropolitan Area Networks (MANs)**
  - Provide connectivity over areas such as a city, a campus

**Figure 1.10** *An isolated LAN connecting 12 computers to a hub in a closet*

**Figure 1.11** *WANs: a switched WAN and a point-to-point WAN*

a. Switched WAN

b. Point-to-point WAN

**Figure 1.12** *A heterogeneous network made of four WANs and two LANs*

## 1-3 THE INTERNET

*The **Internet** has revolutionized many aspects of our daily lives. It has affected the way we do business as well as the way we spend our leisure time. The Internet is a communication system that has brought a wealth of information to our fingertips and organized it for our use.*

### *Topics discussed in this section:*

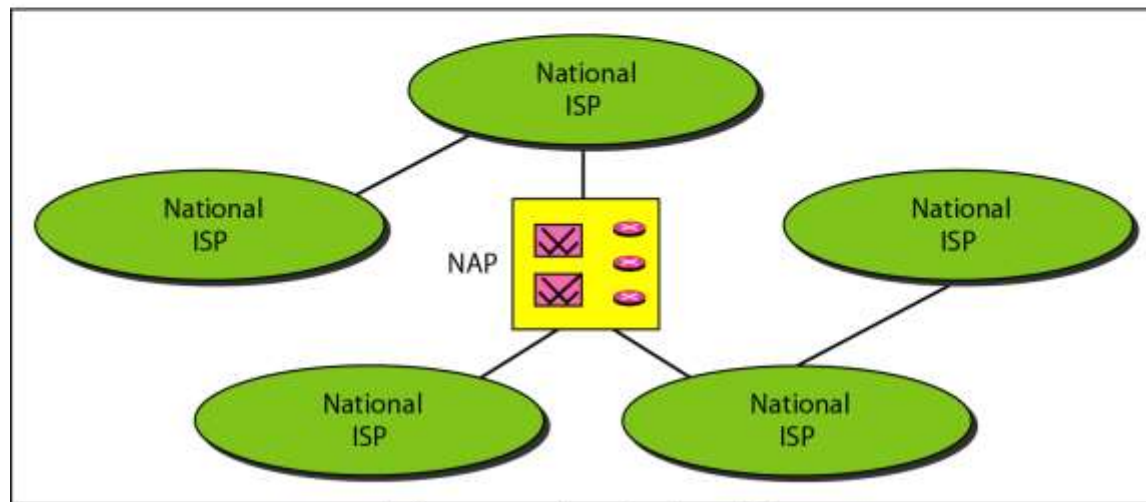

Organization of the Internet

Internet Service Providers (ISPs)

**Figure 1.13** *Hierarchical organization of the Internet*

a. Structure of a national ISP

b. Interconnection of national ISPs

# 1-4 PROTOCOLS

*A protocol is synonymous with rule. It consists of a set of rules that govern data communications. It determines what is communicated, how it is communicated and when it is communicated. The key elements of a protocol are syntax, semantics and timing*

## *Topics discussed in this section:*

- Syntax
- Semantics
- Timing

---

# Elements of a Protocol

---

## ■ Syntax

- Structure or format of the data
- Indicates how to read the bits - field delineation

## ■ Semantics

- Interprets the meaning of the bits
- Knows which fields define what action

## ■ Timing

- When data should be sent and what
- Speed at which data should be sent or speed at which it is being received.
